

Company Profile

Introduction

The zest for entrepreneurship led to the formation of Phoenix Global. With a strong interest in the energy sector, we recognized a growing demand for electrical products across key domains such as Utilities, Renewable Energy, Industrial Infrastructure, Railways, Metro Projects, and Ports.

This insight paved a clear and promising path for us to establish our presence in the industry.

Since its inception, Phoenix Global has emerged as a trusted name in the electrical trading and contracting sector, consistently expanding and achieving new milestones. As part of our growth journey, we became an authorized channel partner for leading industry names such as Raychem RPG Pvt. Ltd., Secure Meters Ltd., and Galaxy Transmission. This strategic alignment has enabled us to offer a wider portfolio of high-quality products and services, further strengthening our position as a reliable industry partner.

Our core expertise lies in managing turnkey projects, delivering end-to-end solutions that include supply, installation, and commissioning of advanced electrical systems. With an unwavering commitment to quality, reliability, and customer satisfaction, Phoenix Global continues to be a name that clients trust for excellence and long-term value.
